ABOUT ME

Junior Software Engineer with hands-on experience in building scalable backend architectures (.NET, C#, Python) and a strong complementary background in enterprise cybersecurity. Currently pursuing an MSc in Cyber Security & Machine Learning, I specialize in integrating secure-by-design principles, Identity and Access Management (IAM), and AI vulnerability mitigation directly into the development lifecycle. Passionate about delivering resilient, high-performance applications and writing clean, maintainable code.

EXPERIENCE

AI & Security Engineering Bootcamp, CG Tech Labs Jul 2026 – Aug 2026

- Engineered a full-stack IAM module using Next.js for 30+ public administration users, redesigning session validation to eliminate unauthorized access risks.
- Executed 318 live security audits on OpenAI and Gemini, deploying prompt injection defenses that successfully mitigated 100% of tested vulnerabilities.
- Secured 101 backend API routes against data leaks and enforced strict execution constraints on Redis and MinIO, optimizing overall system processing speed.
- Directed business analysis via MoSCoW prioritization in a 20-hour sprint, delivering interactive UI guides that decreased user onboarding time.

Cybersecurity Intern, Ovidius University of Constanta Dec 2025 – Jun 2026

- Integrated Sysmon and Suricata telemetry into Wazuh SIEM, achieving 100% threat visibility and continuous monitoring across Active Directory and web application environments.
- Conducted targeted threat hunting and penetration testing using Burp Suite and OpenVAS, effectively identifying and mitigating critical security flaws before deployment.
- Automated SAST/DAST security protocols (using tools like Semgrep/ZAP) directly within GitLab CI/CD pipelines, significantly reducing post-deployment vulnerabilities and accelerating secure release cycles.

Backend .NET Practical Placement, Cornerstone Technologies International Nov 2023 – Jun 2024

- Developed and deployed 5+ RESTful APIs in C# for user authentication, reducing system latency and enabling seamless processing for e-commerce transactions.
- Architected and optimized the database schema using Entity Framework Core, accelerating query response times by 20% and improving overall data retrieval efficiency.
- Programmed the Data Access Layer (DAL) applying OOP principles, standardizing version control via Git and increasing team code-review efficiency.

SKILLS

Technical & Frameworks — C#, Python, Java, SQL, JavaScript, HTML, CSS, .NET, ASP.NET Core, Entity Framework, React, Tailwind CSS, FastAPI, Next.js, LLMs, Computer Vision, OpenCV, NumPy.

Databases — MySQL, SQL Server, SQLite, PostgreSQL.

Cybersecurity & Cloud — Penetration Testing, SIEM (Wazuh), DevSecOps (CI/CD), Nmap, Burp Suite, Microsoft Azure, AI Security (Prompt Injection), Identity and Access Management (IAM).

Core Competencies — RESTful APIs, OOP, Data Structures, Algorithms, Secure Coding, Business Analysis.

Soft Skills — Analytical Troubleshooting, Cross-functional Collaboration, Technical Communication, Agile Iteration, Strategic Planning.

PROJECTS

Planora - AI Graduation Concierge

A conversational AI platform automating graduation package bookings.

- Tech Stack: Python, FastAPI, React, Tailwind CSS, LLMs, Stripe.
- Key Features: Architected an LLM-based engine for natural language intent extraction, real-time shopping cart assembly, and secure Stripe payment integration.

Topic Trips Guide

A web application for planning personalized routes.

- Tech Stack: C#, ASP.NET Core, MySQL.
- Key Features: Programmed custom user routing integrated with an interactive mini-wiki and image retrieval.

Face Recognition App

A Python facial recognition system.

- Tech Stack: Python, PyQt6, OpenCV, NumPy.
- Key Features: Applied algorithms including k-NN, Eigenfaces, and Lanczos using the AT&T Database.

EDUCATION

Ovidius University	Oct 2025 – Jul 2027 Constanta
<i>Master's Degree in Cyber Security and Machine Learning</i>	

Ovidius University , <i>Bachelor's Degree in Computer Science</i>	Oct 2022 – Jul 2025 Constanta
--	---------------------------------

AWARDS & ACHIEVEMENTS

Participant - Hack A Ton AI Agent Hackathon , <i>Mamaia</i>	Jun 2026
• Pitched an AI-driven assistant, "Graduation Concierge", in a 48-hour hackathon. • Collaborated in a 3-person team to rapidly prototype a functional full-stack solution combining Python, FastAPI, and React.	

1st Place Winner , <i>Techstars Startup Weekend Constanta</i>	Apr 2026
• Won 1st place out of multiple teams in a 54-hour hackathon. • Acted as Tech & Strategy Lead for "UniEvents", a centralized events and recruitment platform for students, designing the architecture for event matchmaking algorithms and automated profile analysis.	

CERTIFICATIONS

100 Days of Code: Complete Python Pro Bootcamp — Udemy (Nov 2025)

Microsoft Certified: Azure Fundamentals — Microsoft (Jul 2023)
